

Discover Your Future

MIDDLE SCHOOL CTE

Middle School Career Technical Education (CTE) allows students to find their passion and envision themselves doing something they love. Students in middle school CTE courses are involved in engaging, hands-on projects like constructing a model tiny house, designing a video game, developing a business idea, creating a food truck, exploring careers in the health care field, and much more!

CAREER EXPLORATION WITH DISCOVER YOUR FUTURE

Discover Your Future is a middle school career exploration course that introduces students to the sixteen career clusters through hands-on lessons which include guest speakers and industry field trips. It offers students a one of a kind CTE experience to support them in making more informed decisions about their future. The course is designed to introduce students in 6th – 8th grades to career opportunities across career clusters so they become more aware of what CTE secondary programs are available to them when they get to high school.
